***Product information***

***Microfiber fabrics for  
surface finishing***

## Product information

The indivitara® microfiber fabrics from IndividualiseYourCar, used as surface enhancement film, are flexible PVC sheets with permanent adhesive on the back. They were designed for decorative surface coating on various substrates, such as decorative trims, seat coverings, vehicle headliners, wall panels, doors, furniture, elevators, columns, etc.

Equipped with air channels in the adhesive film, our microfiber fabrics are easy to work with and apply without bubbles.

## Color overview for indivitara® Premium microfiber fabrics

Our self-adhesive indivitara® without seams or design, in the regular Premium version.

### indivitara® Premium colors:

- Black
- Anthracite
- Graphite
- Alaska Grey
- Dirty White
- Imola Yellow
- Fiery Red
- Bahama Brown
- Pacific Blue

### indivitara® Premium Foam colors:

- Black
- Anthracite
- Graphite
- Alaska Grey
- Bahama Brown
- Pacific Blue

## Important Note:

Please refer to the installation instructions for more information on how to install indivitara®. Please note specific instructions for application on non-load-bearing and open-pore surfaces. Overhead application also requires special guidance.

### Color overview for indivitarar<sup>®</sup> Premium microfiber fabrics

indivitarar<sup>®</sup> Design represents the first evolution of our popular indivitarar<sup>®</sup> fabrics. Through ultrasound, an incomplete perforation is created, which produces a sporty appearance and feel.

## Product Features for indivitara® Microfiber Fabrics

Physical Properties and Application Characteristics

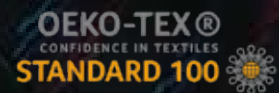

The following data is indicative in the unprocessed state. If you have specific plans, please contact us so that we can assist you with our expertise.

Material	100% Polyester, 70% of the material comes from recycled fabrics.
Film thickness	0.7mm, Black 0.5mm (with Foam + 2-3mm)
Adhesive thickness	0.11mm (with transfer foil)
Stretchability	1:1.7-1.9
Fabric weight	260GSM (Black 220GSM)
Adhesive type	Self-adhesive backing with water-based adhesive
Fire resistance	Not fire-resistant (available upon request)
Flash point	323°C
Odor	Odorless
Frictional force	9.8N per 100mm
Bonding	Only dry adhesions using glue on the underside of the fabric.
Adhesive Strength	5.22N/25mm (Plastic) 6.02N/25mm (Metal) 6.44N/25mm (Plasterboard)
Bonding Temperature (at least ambient and substrate)	15-30°C
Suitable Surface Shapes	All those that allow the processing of microfiber fabric regarding its structure.
Suitable Substrates	Smooth, load-bearing, and clean substrates (without additional adhesive).
Removal	After removal, any possible adhesive residue can be removed with an alcohol-based cleaning agent.

All the aforementioned data, technical information, and recommendations are based on laboratory tests from January 11, 2021; however, no guarantee can be provided for their accuracy and completeness.

**Toxic and harmful substances:**

Not available, Oeko Tex 100 Seal.

**UV resistance (WS):**

indivitara® Premium Black:	7
indivitara® Premium Graphite:	4
indivitara® Premium Anthracite:	3-4

## Storage:

Storage time: up to 3 years

Storage conditions: in dry, dark places

The specified storage time and conditions are indicative, dependent on many external and uncontrollable factors, and therefore should not be understood as a guarantee statement.

## Temperature resistance:

This product has no fire resistance. Burns at 71mm/min.

## Service life:

Highest Temp.: 80°C, 24h - Lowest Temp.: -40°C, 24h

## Application restrictions:

The functional duration does not constitute a guarantee of quality and/or durability, nor an assurance of specific properties regarding our materials. According to our current knowledge, the maximum functional duration provided below can be expected, provided that the films are processed and adhered to as recommended by professionals.

The functional duration is influenced by various factors, including:

- Type of substrate and its thorough preparation
- Adhesion process
- Environmental conditions
- Cleaning frequency and method
- Sunlight exposure

## Application restrictions

Application of films/graphics

The following applications are expressly neither recommended nor guaranteed by IndividualiseYourCar. However, please do not hesitate to contact us so that we can discuss your requirements with you and propose alternative products.

- Exterior applications on vehicles
- Applications on surfaces that do not provide sufficient adhesion (e.g., porous or brittle surfaces)
- The use of adhesion promoters can increase the adhesion on many critical surfaces. However, this is not a guarantee of a permanently functioning connection. In each case, it must be determined which primer to use and to what extent (partial or full-surface) it is to be applied.

## Instructions for Processing

**Sharpness of the cutting blade**

Dull blades result in uneven cutting edges on the foil. We recommend using carbon blades or medical scalpels and frequent blade replacement.

**Temperature and relative humidity:**

Temperature and relative humidity play a subordinate role. However, extreme or highly variable conditions should be avoided.

**Adhesion:**

Please, when using, refrain from adhering the fabric to non-load-bearing and/or non-smooth surfaces without additional adhesive. A suitable substrate is a prerequisite for reasonable support and a perfect result. Moreover, additional adhesive is required for overhead bonding.

**Cleaning and - maintenance:**

To clean, use care products like our sudworx 13 SUEDE PURIFIER.

**Safety instructions:**

Not flame-resistant. Keep away from open flame. Do not swallow.

**Important information:**

This product information contains only technical information. The above information represents our current practical knowledge. It is the responsibility of the purchaser to test the product before use to determine if it is suitable for their intended purpose, considering potential application-related factors. All warranty and liability matters are subject to the respective terms of the purchase contract unless otherwise provided by law. Any liability of IndividualiseYourCar UG is excluded for non-intended use and/or processing that does not follow our specific instructions.
